

IPTS

COMPANY PROFILE

WE DO VEGETATION MANAGEMENT

INTRODUCTION

Intense Protection and Tourists Services trading as IPTS was founded in 2003 by Mr Muziwandile Nala who is also the Executive Chairman of the business.

SECURITY

The company evolved from a guarding and armed reaction service provider to very specialized security services, security solutions, vegetation management and construction.

Apart from keeping your facilities safe and preventing lose, we understand that we become the face of most of our client's profile, as we the first line of physical communication. It is therefore important to understand the business of our client, to be able to understand the type of clients to expect and the kind of help to offer.

IPTS offers the full spectrum of risk management solutions encompassing static, dynamic and procedural security as an integrated service offering. We design, implement and manage solutions, unique to each client's specific needs that prevent loss through proactive and reactive best practice. We have a track record that proves in providing innovative and effective safety and security solutions for personnel, property, assets and information.

OUR VISION

To be a model of excellence the puts our clients first, and to employ highly skilled SMD motivated personnel to ensure quality and value in all areas of our service.

MISSION

To ensure the delivery of quality services to our clients that promotes our vision and values, through;

- Creating and maintaining partnerships.
- Attracting and retaining motivated employees.

Vegetation management

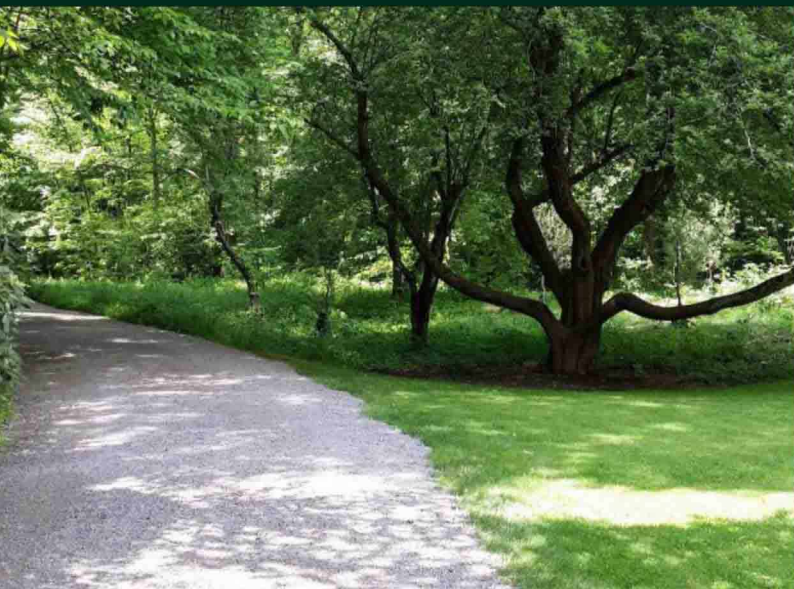

IPTS is a leader in providing comprehensive vegetation management services for public utilities, municipalities across SA. We have earned a reputation for providing cost-effective solutions tailored to meet and exceed the needs of our customers. Our focus on maximizing efficiency while not compromising safety and quality has made us the contractor of choice for many utility companies.

We do it all

We service a range of utilities from the largest investor-owned transmission and construction companies to community-focused projects and government projects.

IPTS in all forms of vegetation management work, site clearance and site rehabilitation, including:

- Line Clearance A
- erial Trimming Hazard Tree Removal
- Right-of-Way Clearing and Reclamation
- Emergency Storm Response
- Tree Growth Regulator Application
- Urban and Rural Tree Pruning and Care Pipeline right-of-way maintenance
- Substation Maintenance
- Parks maintenance
- Contract Personnel Consulting

We're trained and ready

Specially trained crews perform all the tasks needed in the trees and on the ground, with an extensive support staff including safety specialists, general foremen, and crew leaders.

We have extensive operational experience and knowledge of the electric utility industry. We understand your needs, objectives, and goals because members of our team have managed the budgets, overseen the programs and dealt with the challenges in vegetation management from the utility's and the contractor's perspective.

Intelligent Vegetation Management

Like peanut butter and chocolate, vegetation management and technology go better together. At IPTS, we have a turnkey, state-of-the-art solution that can take vegetation management operations to a new level of productivity and effectiveness. But we also have the technology expertise, willingness and flexibility to work with whatever solution you seek to deploy.

The heart of the Intelligent Vegetation Management approach is a philosophy of leveraging investments in GIS, outage management, customer information and ERP systems to connect vegetation management operations into technology ecosystems – yours and ours.
